

Panda's Awakening

Into the Gariverse

In a spiritual dimension, a peaceful clan of Sage Pandas sensed an impending imbalance caused by the merging and expansion of systems forming the Omega Syndicate. These Pandas discovered that they were thought manifestations of a human species living in universe 777 and that the survival of their existence lay in the hands of this species. Due to the vast and separating dimensions, the only mode of communication was through a digital crypto system. The plan involved inducing positive and brave thoughts into NFT creators, in the format of the Sage Pandas, to combat the negativity and misinformation conjured by the Omega Syndicate.

The NFTs are to be owned by a human, unlocking their full potential and causing a mass awakening amongst the Pandas. Individuals who sense the awakening and notice the fear and imbalance are urged to join the battle by proving the value of these tokens and unlocking the powerful roles and abilities of the Sage Pandas. Joining now will give a unique and powerful control in their realm and may extend to other clans who are yet to realize and join in this crucial and meaningful battle that has just begun.

The Pandas being exclusive NFTs collection from Chingari, they will be driving the Content and the Creation stories that will be implemented on the Chingari app platform and the Gariverse. Special perks await for the Panda NFT holders and enthusiasts & we support the connect to communities across the globe. Perks ranging from in-app boosts & benefits to showcasing your content in special sections and empowering a new wave of content creation in the Web3 Social media.

Chingari being a web3 social media app and the Panda NFTs being closely associated in promoting Art and Content as the ambassadors of Gari Network, they are mutually synergised to share exclusivity to special communities.

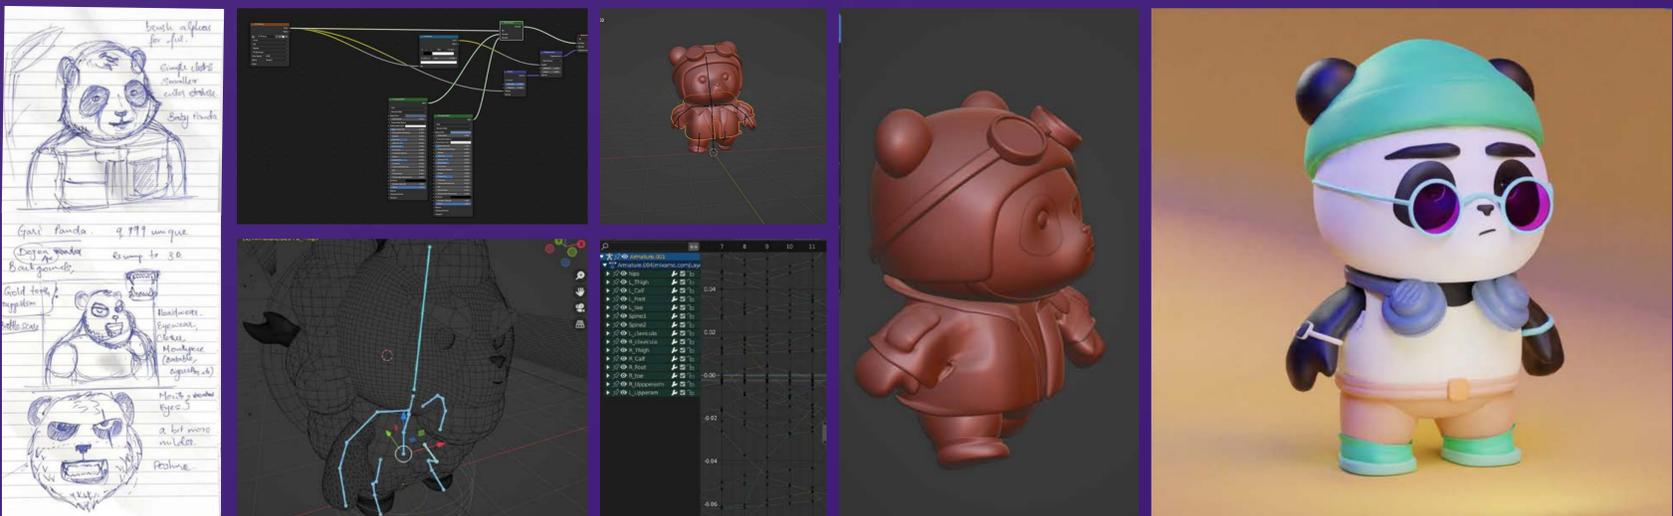

✦ Bringing panda's to life

Panda NFT's are the first step in engaging our community to a whole new exciting experience. So we had to start all over from scratch. The creation process involved several steps to bring the concept to life and create engaging, dynamic & scalable NFTs.

We started by defining the concept for the project, which involves iterating the pandas from its original objective and expand its universe in to various scalable and multi-platform concepts. We wanted to convey a fun, real-time and engaging storyline that would resonate with collectors.

After a few brainstorm, we sketched out some initial ideas for the NFTs to gain some clarity on how we are going to iterate further. Locking in on a design language and art style for setting the tone and baseline, we moved on to creating Orthographic drawings and then the 3D mesh models.

To make the NFTs look more realistic and engaging, we added textures and materials to the 3D models. We then rigged and animated the pandas to give them motion and personality, making the NFTs more engaging and dynamic.

Once the NFTs were completed, we rendered them in high quality to make them look stunning. Finally, we will mint the NFTs on the Aptos blockchain platform and launch them for sale on Topaz marketplace.

The Panda's Awakening NFTs were made with love and care with industry leading speed & skill and has been a fun, insightful and creative journey, resulting in beautiful and engaging NFTs. We are thrilled to share it with you and can't wait to work on the following series and on all it's related platforms. The story will be shared in community AMAs in the weeks to come.

★ Perks

Animated 3D Panda NFTs

Will be focused more on the Art, Fun & Gamification while having the following Utilities

- **Chingari App**
 - Integration into the Chingari app as an exclusive collection
 - Holders can showcase their NFTs to other users
 - Holders can flaunt their Panda NFTs as pfp's that are distinct from other normal Creators.
 - Creators empowerment through discounts on boosts of their profiles and videos
 - Additional benefits to Chingari Creators with Panda NFTs to get exclusive access to partnered content.
 - Unlocking Panda themed filters etc exclusively for Creators with Panda NFT.
- **Ecommerce:** Cashbacks on various ecom platforms
- **Aptos Ecosystem**
 - Exclusive access to the further Aptos based NFT item Drops
 - Partnerships & Integrations with Aptos Ecosystem Projects
- **More Surprises coming soon**
